Question	questionType	option1	option2	option3	option4		
A bean can be requested by:-	MULTIPLE_CHOICE_QUESTIONS	getBean method	reference from another b	Both A and B	By getMethod()		
Which attribute is used to set the scope of the bean?	MULTIPLE_CHOICE_QUESTIONS	setScope	scope	getScope	refScope		
Which one is the default scope of the beans?	MULTIPLE_CHOICE_QUESTIONS	singleton	prototype	session	request		
Which interface is used to perform destruction of beans?	MULTIPLE_CHOICE_QUESTIONS	Initializing Bean	Bean Factory	Disposable Bean	Destruction Bean		
The process of injecting dependancy Injection either by setter o	MULTIPLE_CHOICE_QUESTIONS	Autowiring	Data Binding	Bean destruction	Template creation		
A programming technique in which object coupling is bound at r	MULTIPLE_CHOICE_QUESTIONS	Inversion of Control	Controlling of Object	Bean Life cycle	Restrospection		
Which attribute is used to specify class name of the bean?	MULTIPLE_CHOICE_QUESTIONS	id	scope	class	constructor-args		
Spring Framework was developed by	MULTIPLE_CHOICE_QUESTIONS	Dennis Ritchie	James Gosling	Gavin Ken	Rod Johnson		
Which of the following is not the type of Autowiring?	MULTIPLE_CHOICE_QUESTIONS	ByName	ByType	ByConstructor	ByBinding		
Main Advantage of using Spring Framework is	MULTIPLE_CHOICE_QUESTIONS	Loose Coupling	High Integrity	Less coding	Modularity		
The implemenation of ApplicationContext where full path of the	MULTIPLE_CHOICE_QUESTIONS	ClassPathXmlApplicationCon	FileSystemXmlApplication	WebXmlApplicationConte	Bean Factory Object		
Annotation added as an input parameter to the handler method.	MULTIPLE_CHOICE_QUESTIONS	@PathVariable	@Path	@PathLocale	@PathAttribute		
The objective of the Spring Rest is	MULTIPLE_CHOICE_QUESTIONS	for accessing data from third	for publishing an applicat	to develop Web Applicat	Only A and B are correct		
Spring supports a series of mechanisms to generate a REST servic	MULTIPLE_CHOICE_QUESTIONS	TRUE	FALSE				
SOAP is XML based, platform independent and language independ	MULTIPLE_CHOICE_QUESTIONS	TRUE	FALSE				
Accessing a third-party REST service inside a Spring application.	MULTIPLE_CHOICE_QUESTIONS	RestTemplate Class	ViewResolver	InternalViewResolver	View		
REST service end point comprises an address that	MULTIPLE_CHOICE_QUESTIONS	starts with http:// and ends	starts with http:// and en	no certain URL is specifie	depends upon the platform used		
REST stands for REpresentational State Transfer.	MULTIPLE_CHOICE_QUESTIONS	REpresentational State Trans	Representative in WEB co	Repeated State of Objec	Real view of Object State		
ResponseEntity represents the whole HTTP response: status code	MULTIPLE_CHOICE_QUESTIONS	TRUE	FALSE				
Data from Rest API can be fetched using	MULTIPLE_CHOICE_QUESTIONS	headers	Response Body	status	request		
A web service contract is described using :-	MULTIPLE_CHOICE_QUESTIONS	Web Services Description Lar	Web Services Description	Both A and B	None of the above		
In Memory or Embedded Database is	MULTIPLE_CHOICE_QUESTIONS	Hibernate	Ibatis	MySQL	H2		
What's true about the following @Entity association between Hou	MULTIPLE_CHOICE_QUESTIONS	OneToMany unidirectional as	OneToMany bidirectional	The association owner is	The association owner is the Window class		
The return type of findAll() method in JPA repository is	MULTIPLE_CHOICE_QUESTIONS	List	Array	Single Object	String		
The exception thrown JPARepository when getOne() is executed	MULTIPLE_CHOICE_QUESTIONS	IdNotFoundException	NullPointerException	EntityNotFoundException	ElementNotFoundException		
The Java Persistence API is the standard way of persisting Java o	MULTIPLE_CHOICE_QUESTIONS	TRUE	FALSE				
Observe the following code given below and Identify the type of	MULTIPLE_CHOICE_QUESTIONS	JPARepository	CrudRepository	HibernateMapping	DataRepository		
MongoDB is a NoSQL database which stores the data in form of	MULTIPLE_CHOICE_QUESTIONS	rows and columns	Key-value pairs	Graphical structure	Wide-column stores		
NoSQL Database used in Facebook is	MULTIPLE_CHOICE_QUESTIONS	MongoDB	Redis	Cassandra	Ibatis		
Which of the following statement is true about MongoDB?	MULTIPLE_CHOICE_QUESTIONS	MongoDB is classified as a No	MongoDB favours XML form	MongoDB is column orien	MongoDB is SQL Database
